

 **PIMAR**  
DESIGN COLLECTION

 **PIMAR** da 150 anni svolge il delicato compito di offrire una pietra dalle caratteristiche uniche, una storia di esperienza in cui l'azienda non ha mai tradito i suoi obiettivi. Nel tempo gli artisti del luogo hanno saputo valorizzare al meglio tutte le qualità e la versatilità della pietra leccese, dando forma a diverse tipologie di costruzioni dal '600 in poi, la cui bellezza e solidità sfidano la storia. Oggi un gruppo di progettisti, degno successore di quel saper fare "artistico" che ha reso il barocco leccese conosciuto in tutto il Mondo, è riuscito a interpretare il materiale e tradurlo in un'eterogenea collezione di elementi d'arredo per la casa ed il giardino. L'intero progetto, la cui direzione creativa è stata affidata a De-Signum Studio Lab, ha inoltre visto la partecipazione di artigiani salentini, intrecciatori di giunco e piccole manifatture locali; fattori importanti che hanno reso possibile una collezione dall'anima a KMO.

 **PIMAR** four generations of stone manufacturers, one after the other, inherited the task to offer a unique type of stone. Their experience during 150 years guarantees a perfect know-how in the manufacturing of a versatile, ductile and cosmopolitan stone – a real family's stone. Since the XVII century local artists have been able to make the most of the quality and versatility of our Lecce limestone in different types of buildings of unrivalled beauty and solidity. Today a group of designers is able to interpret the material and translate it into an eclectic collection of furniture for the home and garden. The entire project, whose creative direction was entrusted to De-Signum Lab Studio, has also seen the participation of craftsmen from Salento, cane weavers and small local factories; important factors that have made possible a KMO collection.
