

CAPASA

Design by
Silvio De Ponte

Scavato in un blocco monolite di pietra resistente al fuoco, il braciere Capasa si distingue per la forma semplice e pulita, sorretta da una base in ferro a tre piedi.

Sculpted from a monolithic block of fireproof stone, the Capasa brazier is defined by a simple and pared-down shape supported by an iron base resting on three feet.

Materiali / Materials

Pietra "Piromafio" / "Piromafio" stone

Acciaio grigio-marrone / Grey-brown steel
