SUPPLIER OF STONE MATERIALS:
Pi.Mar srl Quarrying and dressing of Limestone, Melpignano (LE)

INSTALLER OF STONE MATERIALS:
Maroccia Costruzioni Srl

STONE MATERIALS EMPLOYED:
Pimar stone

This 3*L Hotel is located just outside the historic center of Lecce and offers rooms with personalized designs and modern furnishings. The Eos Hotel underwent total structural renovation. Each of the 30 rooms composing the hotel was uniquely reinterpreted in the original style and culture of Salento. The rooms were designed based on the projects that won the Concept Competition held by Faculty of design of the Politecnico of Milan. The external facades and the loggia at the top level are completely clad with Pimar stone with alternating smooth and bush hammered surfaces and constant thicknesses. This alternation of finishes, accentuated when they are grazed by sunlight or by the floor-installed artificial light fixtures during the night, emphasizes and gives elegance and prestige to the ultra-modern openings in the facades and in the loggia.
